CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both authors and subjects. These compilations generally cover a period of five years with the exception of *Physics Abstracts* which, since the 1985 volume, covers the period 1984-88. The table below shows the costs and periods for the range of cumulative issues.

OTHER INSPEC SERVICES

SDI
(Selective Dissemination of Information)
This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Data base. Information is dispatched weekly on 150 mm × 100 mm (6" × 4") cards.

TOPICS
This is an SDI service based on standard profiles. There are over 90 subjects covering high-activity areas of research and development. This is an inexpensive current awareness service for engineers and researchers in the electronics or computer sciences within their subject area.

MAGNETIC TAPES
Tapes containing all the information included in the INSPEC publications are issued fortnightly. They enable the larger research and development organisations to produce their own in-house information and current awareness services.

JAPAN UPDATE
Six main technology reports are covered by Japan Update Services. Abstracts are provided for articles selected from about 100 Japanese journals and translations available on convenient subscription. This unique new service is designed to help engineers stay aware of new technological developments reported in the Japanese literature.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.)

This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database. Information is dispatched weekly on 150 mm × 100 mm (6″ × 4″) cards.

TOPICS

This is an SDI service based on standard profiles. There are over 90 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

JAPAN UPDATE

Six high-technology subjects are covered by Japan Update Services. Abstracts are provided for articles selected from about 300 Japanese journals and despatched weekly on conveniently-sized cards. This inexpensive service is designed to help engineers stay abreast of technological developments reported in the Japanese literature.

PROPERTIES OF Gallium Arsenide

This publication, the second in the EMIS Datareviews series, will be an invaluable work of reference for all those engaged in research and development involving gallium arsenide. Leading experts from the USA, Germany, Japan and Great Britain have co-operated in collating and evaluating the latest data on the physical properties of this increasingly important material.

Contents include:

- **Physical & Thermal Properties**
- **Carrier Concentrations and Ionization rates**
- **Energy Gap**
- **Electro-optic Properties**
- **Photoconductivity**
- **Defects & IR imaging of defects**
- **Surface structure & oxidation**
- **Interfaces and contacts**
- **Resistivity**
- **Electron & hole mobility**
- **Optical functions**
- **Infra-red absorption**
- **Photoluminescence**
- **Diffusion of impurities**
- **Etching rates**

Properties of Gallium Arsenide casebound 280 x 210 mm is priced at £85 UK, $195 USA and £110 elsewhere.
